SignTorch Stencil Factor

Special Marks on the end of each filename to indicate if the design is a silhouette, stencil, or other 1 piece design or not. Pictures below assume grey represents final material.

_Underscore means the design is a pure silhouette with no holes. It has one cut around the periphery and can be cut either into or out of one solid piece of material.

=Equal Sign means the design is like a silhouette but it has interior holes. The design can be cut out to form one solid piece but it cannot be cut into one solid piece of material.

#Pound Sign or **!Exclamation** preceding either above symbol means there are multiple disconnected primary objects in the scene where some sort of connection is required to produce a one-piece design. Such as two animals or two people that are not connected.

+Plus Sign means the design has multiple solid but disconnected elements. The design can be cut into one solid piece of material but it cannot be cut out as one solid piece.

Stencil Factor is irrelevant for vinyl cutting, engraving, and processes with backing material to hold loose pieces in place. If none of the above marks are appended to the end of the filename, then the design is not one-piece. Stencil Factor Marks **only** indicate one-piece geometrical qualities. They do not indicate whether the design itself is actually compatible with any particular cutting process or any particular size of project.
